

Catalyst Electronic Health Record System

A truly integrated system built to meet the ever changing needs of the behavioral health care field.

Catalyst was designed to follow the consumer from initial assessments through to an electronic discharge summary. The system is built to eliminate duplicate data entry and to minimize paper, allowing the service provider to concentrate on service delivery. Catalyst integrates with other systems including, payers, managed care, pharmacy adjudication, state funding entities, etc.

Catalyst Major Modules

Intake Assessments

- Initial assessment of consumer

- Crisis Plan
- A.C.T. Crisis Plan

Coverage/Authorizations Utilization Management

Tracks utilization of each service delivered
Alerts user when authorizations is exceeded

Managed Care Forms

Letter of referrals
Consult report
Outpatient treatment report

Notes/Services/Billing Generation

Templates
Generates the billing entry eliminating the need to
paper chase the event to billing
Digital signature/co-signing of notes
Residential daily activity monitoring
Daily/Weekly logs

Billing

Multiple rates based on Insurance/CPT/Credentials
Evaluation and Management Psychotherapy
Validation of outbound EDI transactions
HCFA1500 / 837P X12
Medicaid, Medicare, 3rd Party Insurance, Contracts
Fee for Service billing
Medicaid Application tracking
Retro Medicaid
Patient billing
On-hold tracking
Automated payment posting
- 835, GIA FFS e-bill processing
Claim denial tracking
Billing notes
Accounts receivable – Time Period/Program/Payer
Automatic posting of contractual adjustments
Write-off process – Time period/Program/Payer

Pharmacy

On-line adjudications NCPDP D.0
Inventory tracking
Label/monograph printing
Integrated with clinical orders
Lab tracking/monitoring

Medication Tracking

Clinical orders including service orders
e-Prescribing to Sure Scripts
Outside medications
Patient assistance medication tracking
Allergy tracking

Residential

Private home care supervisory home visit tracking
Residential daily activity monitoring

Medical Records

Archive paper medical record tracking
Release of information tracking
Scanned records management attached to chart
